

KickboardZ

The robust kick scooter rack for schools and public grounds

Kick scooters are used everywhere and are established as a simple way of transportation for kids, youngsters and adults. The difficulty in providing an adequately functional, shapely and inexpensive parking solution which is easily used by all age groups is unsolved until now.

With its distinct graphical appearance, KickboardZ elegantly conforms to all these requirements and confidently blends into all environments. Forget the challenging folding and hanging of the scooter with KickboardZ: Just slide the scooter into the rack and secure with a bike lock if necessary.

KickboardZ is very robust and simply mounted in different ways.

SkateboardZ & LongboardZ

The preiswerte Skate- & Longboard rack for schools and public grounds

Skateboards and longboards have been regaining their popularity for quite a while. But there are hardly any functional and robust, yet still aesthetically pleasing, solutions to park or hang these practical modes of transportation in public or semi-private spaces.

SkateboardZ offers precisely this parking opportunity and can be used alone or in combination with the proven KickboardZ stands. Boards can be simply hung up and secured with a padlock (with a long shackle) or a cable lock. With a variety of installation options, SkateboardZ are also easy to extend.
